ABSTRACT:

PROBLEM TO BE SOLVED: To provide a system by which a user can download pay contents without bearing communication fees.

SOLUTION: In this contents utilization fee accounting system, when a server for a distribution provider for distributing the pay contents receives a purchase request from a user terminal through a telephone line, the Internet network and a server for a line provider A, the server for the distribution provider prepares an ID for download and a term of validity corresponding to the requested pay contents and notifies the user terminal the ID for download and the term of validity along with the telephone number of a provider B access point for connecting the user terminal to a server for the line provider B. When the ID for download is notified from the user terminal through a free dial line, the provider B access point, the server of the line provider B and the Internet network, the server for the line provider A starts to transmit the requested contents data to the user terminal when the ID for download is within the term of validity.
